

## Soft Silicone Foam Dressing-LITE Slimmer Version with Adhesive Border

Soft Silicone Foam Dressing-LITE with Border is a slimmer foam dressing for the management of low to moderate exuding wounds and consists of a thin, absorbent soft silicone foam layer. This highly comfortable and flexible foam pad consists of a vapor-permeable, moisture-proof outer film, and a silicone adhesive with a low profile border that adheres to the surrounding skin, allowing exudate to be absorbed, while preventing leakage. The dressing is easy to apply and remove minimizing pain, maceration and the risk of secondary damage to the wound area.

### Indications:

A primary dressing that may be used for the management of mild to moderate exuding wounds, especially for the hard to dress area, such as leg and foot ulcers, pressure ulcers, traumatic wounds, partial thickness burns.

### ENHANCED PATIENT COMFORT

*The superb absorption of foam and the gentle adhesion of silicone minimizes pain and trauma during dressing change.*

*Slimmer Version with Adhesive Border*

Not made with natural rubber latex.

### Features & Benefits:

- Thin, comfortable, safe, easy to apply and remove
- Sterile, self-adhesive and showerproof dressing with a low profile border to seal the wound area and prevent exudate leakage
- Superior flexibility and comfortable adherence to skin, while minimizing pain, trauma and wound maceration
- Effective and gentle wound protection for several days
