

Clear Can Liners

Clear Can Liners are crafted from a durable high-density polyethylene (HDPE) material. These liners offer superior puncture and tear resistance, preventing leaks and spills. The transparent nature of these liners allows for easy visibility of the contents, making it simple to identify and manage waste disposal. The high-density construction ensures maximum load capacity, enabling the liners to withstand heavy loads without tearing or compromising their integrity. These liners also feature star seal bottoms, which distribute weight evenly and enhance leak resistance, offering added protection against spills and odors.

Features & Benefits:

- Star-sealed bottom
- Clear liners allows for easy visibility of the contents
- Convenient coreless roll dispensing
- Available in a variety of sizes to accommodate a wide range of receptacles
- Use in hamper stands or receptacles
- Not made with natural rubber latex
