

Yellow Can Liners (Biohazard - Infectious Waste)

Yellow Biohazard Can Liners are an essential tool for any facility that handles biohazardous waste. Their durability, biohazard warning color, and reliable performance make them the ideal choice for maintaining safety and helping prevent cross-contamination.

Constructed from low-density polyethylene (LDPE) material, Procure liners are specifically engineered to provide exceptional strength and puncture resistance. The vibrant yellow color serves as a universally recognized symbol for **Biohazard or Infectious Waste or Liner**, ensuring clear identification and adherence to safety protocols.

Equipped with a star seal bottom, these liners distribute weight evenly and enhance leak resistance. This feature provides an extra layer of protection against potential spills or leaks.

Features & Benefits:

- Star-Sealed Bottom
- Easy Read Black Print, in English and Spanish
- Color Coded Yellow for Infectious Waste or Liner
- Convenient Coreless Roll Dispensing
- Use in Hamper Stands or Receptacles
- Not Made with Natural Rubber Latex
- Dart Impact Strength of 165g (ASTM D1709-01)
- Tear Resistance Strength of 480g (ASTM D1922-00A)
