

Hydrocortisone Cream 1%

Procure Hydrocortisone Cream is a topical medication that contains a low concentration of the corticosteroid hormone hydrocortisone. It is used to alleviate inflammation, itching, and redness associated with various skin conditions, including eczema, insect bites, and allergic reactions. The cream works by suppressing the immune response and reducing inflammation in the affected area, providing temporary relief and promoting healing.

Benefits:

- Relief of minor skin irritations, itching and rashes.
- Provides fast and targeted relief to the affected area.
- Helps soothe and calm irritated skin, promoting healing and restoring comfort.
- Easy to apply and absorbs quickly into the skin.
