

Zinc Oxide Ointment

Procure Zinc Oxide Ointment is a skin protectant with a high concentration of zinc oxide. Its made from a versatile compound with various therapeutic properties. It is commonly used for its soothing and protective properties on the skin. The ointment forms a barrier that helps protect against moisture, friction, and irritants, making it beneficial for treating skin irritations, rashes, and minor abrasions including diaper rash. It is also utilized in the treatment of other skin irritations, such as minor burns, sunburns, chafing, and allergic reactions.

Benefits:

- Provides a thick and protective barrier on the skin's surface.
- Treat and prevent diaper rash.
- Helps soothe irritated skin and promotes healing by protecting against moisture and friction.
- Dries the oozing and weeping of Poison Ivy, Poison Oak, and Poison Sumac.
