

Antifungal Powder (Miconazole Nitrate 2%)

Antifungal Powder containing Miconazole Nitrate 2% is a highly effective solution for combating fungal infections. This specialized powder helps treat most fungal skin irritations caused by yeast (candida albicans), such as athlete's foot, jock itch and ringworm. It helps relieve symptoms such as itching, cracking, burning and redness. The active ingredient, Miconazole Nitrate, works by inhibiting the growth of fungi, providing relief from itching, burning, and discomfort. With its soothing and absorbent properties, the powder creates an inhospitable environment for fungal growth, helping to restore skin health and prevent further infection.

Ideal for both treatment and prevention, Antifungal Powder with Miconazole Nitrate 2% offers a reliable and convenient solution for individuals seeking relief from fungal skin conditions. Provides a moisture barrier to protect the skin from external moisture, while the Miconazole Nitrate treats fungal infections. It helps soothe the affected area, reducing inflammation and promoting healing.

Features & Benefits:

- Helps treat foot odor, athlete's foot and ringworm.
- Targets the root cause of the infection, inhibiting the growth and spread of fungi.
- Provides relief from common symptoms.
- Helps to prevent the recurrence of the condition.
