

Paper Soufflé Cups

Paper Soufflé Cups are small, disposable cups made from paper material. They are commonly used in various food and beverage applications. These cups are often found in healthcare settings for dispensing medication, serving condiments, or collecting samples. They are lightweight, convenient, and easy to handle. Soufflé cups are new environmental friendly products that can fully engage with biodegradation and compost.

Features & Benefits:

- Ideal for medication distribution
- Works well with some pill crushers for clean and simple pill crushing and dispensing
- Commonly used for serving condiments, sample portions of food and more
