

Hydrogel Impregnated Sterile Gauze Dressing

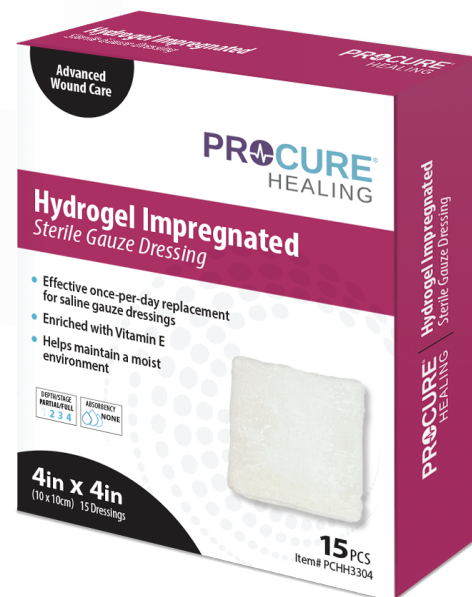

ProCure Hydrogel Impregnated Sterile Gauze Dressing

is specially designed to promote optimal healing while ensuring comfort and protection. Each medical gauze consists of a hydrogel composition, the main ingredients are carbomer, triethanolamine, enriched with vitamin E and so on, which is packaged and sterilized for one-time use. Each dressing provides a moist wound environment, ideal for enhancing healing and minimizing pain during dressing changes.

ENHANCED PATIENT COMFORT

A sterile, nonadherent gauze dressing impregnated with our vitamin E enriched hydrogel. The high moisture content serves to rehydrate wound tissue and cooling action soothes and reduces pain. Easy application and removal.

Not made with
natural rubber latex.

Features & Benefits:

- Hydrogel-impregnated for enhanced moisture retention
- Sterile and ready-to-use for optimal wound care
- Enriched with Vitamin E
- Non-adherent for easy removal and less pain during dressing changes
- Helps promote faster healing by maintaining a moist wound environment
