

## Transparent Film *Sterile Semipermeable Adhesive Dressing*

**ProCure Transparent Film – Sterile Semipermeable Adhesive Dressing**, offers a sterile, breathable barrier that protects wounds while allowing oxygen and moisture vapor exchange to promote healing. The clear, flexible design ensures easy monitoring without removal, reducing the risk of contamination. The hypoallergenic adhesive ensures secure placement and minimizes skin trauma upon removal, making it ideal for catheter sites, superficial wounds, and post-operative incisions.

### ENHANCED PATIENT COMFORT

*This transparent dressing is designed to allow moisture vapor to escape while helping to prevent bacterial contamination. It easily conforms to difficult areas and enables monitoring of wound healing while being waterproof.*

*Not made with  
natural rubber latex.*

### Features & Benefits:

- Transparent design for easy wound monitoring
- Semipermeable to allow oxygen and moisture vapor exchange
- Sterile and adhesive for secure application
- Ideal for minor wounds, burns, or IV sites
- Waterproof barrier to protect against contaminants
