

100% Collagen Wound Dressings

ProCure 100% Collagen Wound Dressings are sterile Type I collagen products available in powder wound filler and sheet wound dressing formats. Both formulations support the body's natural healing process by maintaining a moist wound environment, promoting tissue regeneration, and encouraging healthy granulation tissue growth.

The powder filler conforms to wound contours, gently filling irregular or deep wounds, while the sheet dressing provides gentle coverage for surface wounds. Both options help manage wound drainage effectively and are designed to enhance patient comfort, reducing discomfort during dressing changes.

ENHANCED PATIENT COMFORT

Supports the body's natural healing process while gently filling wound contours, maintaining moisture balance, and reducing discomfort during dressing changes.

Features & Benefits:

- Sterile Type I collagen supports natural tissue regeneration
