

70% Alcohol Hand Sanitizing Wipes

ProCure Hand Sanitizing Wipes provide quick, effective protection when soap and water aren't available. Formulated with 70% alcohol, they kill up to 99.99% of most common germs while leaving hands soft and refreshed. Each unscented wipe is enriched with aloe, glycerin, and vitamin e to help moisturize and soothe skin. The durable nonwoven cloth delivers thorough cleansing without rinsing, making it ideal for use after patient contact or anytime soap and water are unavailable.

Conveniently packaged in a dispensing canister with a snap-close lid to maintain freshness and reduce cross-contamination, these generously sized wipes are perfect for healthcare, office, and everyday use.
