

## Povidone Iodine Prep Swabsticks, Pads, & Solution

Povidone Iodine Prep products are available in prep pads, swabsticks, and a liquid solution, providing an effective antiseptic for skin preparation. These products help to cleanse and disinfect the skin before medical procedures, reducing the risk of infection.

Povidone iodine offers broad-spectrum antimicrobial activity, making it ideal for use in wound care, surgical sites, and any situation requiring skin antiseptics.

### Features & Benefits:

- Broad-spectrum antimicrobial activity against bacteria, viruses, and fungi.
- Ready-to-use and easy to apply for quick skin preparation.
- Non-stinging, gentle on the skin.
- Ideal for use before surgical procedures, wound care, and injections.
- Reduces the risk of infection by disinfecting the skin.
