

## Hydrogel Wound Dressing

**ProCure Hydrogel Wound Dressing** is a soothing, water-based amorphous gel that conforms gently to wound contours while maintaining a moist healing environment. Designed to donate moisture to dry or minimally draining wounds, it helps soothe, hydrate, and cool painful areas. Ideal for hard-to-reach wounds, burns, ulcers, and surgical sites, this non-oily hydrogel promotes comfort and supports the body's natural healing process.

### Features & Benefits:

- Water-based, amorphous gel gently conforms to wound contours
- Donates moisture to dry or minimally draining wounds
- Soothes, cools, and hydrates for pain relief and comfort
- Non-oily formula provides clean, residue-free application
- Supports moist wound healing for optimal recovery
- Ideal for burns, ulcers, surgical sites, cuts, and abrasions
- Easy to apply and compatible with secondary dressings
