

ODORZAP

Odor Eliminator

ProCure ODORZAP Odor Eliminator is a air freshener and deodorizer in one designed for use in healthcare environments. Formulated with Soyethyl Morpholinium Ethosulfate, it works by forming complexes with volatile organic compounds (VOCs), effectively neutralizing odors at their source and reducing their presence in the air.

In addition to its odor-eliminating properties, **OdorZap** features a light citrus fragrance that helps maintain a clean, fresh-smelling environment without overpowering scents. Ideal for patient care areas, it supports a more pleasant and hygienic atmosphere.

*Neutralizes
Odors
Quickly*
